Small Town Harbour Marken

The former island of Marken (nowadays about 1800 inhabitants) was connected by a dike to the mainland in 1957. The authentic island atmosphere of the old days still prevails on Marken with its small alleys, drawbridges and closely built houses, sitting atop of mounds to protect them from floods. Not only does its traditional costume make Marken a colourful peninsula; white painted window frames contrast beautifully with the green and black wooden houses and the typical Dutch skies. Marken is everything you would expect from Old-Holland. Please respect the peninsula and the privacy of its inhabitants.
